

Athlete Performance Policy

Updated: March 1, 2015

Athletes often excel when given an opportunity to perform under pressure. Our goal is to have all of our athletes experience the thrill of performing in front of an audience, be it in their home training environment or at another venue. We strive to create a positive training environment based on principles of fair play and this document aims at providing you with information on Athlete Development Opportunities as relates to performing. The opportunities listed below can be divided into two categories; one based on criteria and the other on rotation.

Rotation Based Opportunities:

Example: hockey game intermission performances etc.

All registered skaters who train full time for their level as determined by the Fee Guide are on a master list and they will be rotated through. Generally this is done alphabetically, however circumstances such as short notice of the event and athlete illness may require the Director of Competitive Development to make changes to the rotation.

Criteria Based Opportunities:

Example: Ice Shows, Light Up Ceremony

Centre Coaches are given an opportunity to vote. Criteria based opportunities are decided based on two factors:

1. Result based factors:
 - Champions at CNC Regional Championships, followed by medalists at Skate Canada Sectionals, Skate Canada Challenge and Canada Winter Games
2. Traits, behaviours and practice habit based factors:
 - attendance
 - effort/dedication/work ethic
 - team spirit
 - attitude/determination
 - passion for skating

The Centre is very proud of all of their athletes and we look forward to having them showcased at various events throughout the season and as frequently as possible. This athlete development policy was created by the Director of Skating and the Director of Development. Should you have any questions regarding this athlete development policy please contact the Director of Competitive Development.
